

# generateregisteravtalegirolink

## Create link

This is used for online registration of AvtaleGiro, the norwegian direct debit solution. This will present the customer with the Nets online registration page. The AvtaleGiro information will be stored in BRP when the registration is completed and the browser will be returned back to the given callback url. For more information about the online registration part and return codes see, [Online registration of AvtaleGiro](#).

## Request

```
POST:APIURL/generateregisteravtalegirolink.json
companyid=4
callbackurl=http://abc.de
apikey=338934897438
```

## Parameters

| Name        | Value                     | Description   | Data type | Default |
|-------------|---------------------------|---|-----------|---------|
| companyid   | companyid=4               | The ID for the company that will own the avtalegiro contract                                | ID        |         |
| callbackurl | callbackurl=http://abc.de | The callback url to which the browser should be redirected to after the online registration | String    |         |

## Response

| Tag | Example   | Data type | Description                    |
|-----|---|-----------|--------------------------------|
| url | <code>http://some.url.se/brponline/external/avtalegiro/register?callbackUrl=http%3A%2F%2Fabc.de&amp;customerid=82&amp;companyid=4&amp;hash=someSecretHashGeneratedByBrp</code>              | String    | Url to redirect the browser to |
|     | <pre>{   "url": "http://some.url.se/brponline/external/avtalegiro/register?callbackUrl=http%3A%2F%2Fabc.de&amp;customerid=82&amp;companyid=4&amp;hash=someSecretHashGeneratedByBrp" }</pre> |           |                                |
